

Precast/Prestressed Concrete Institute

Tuesday, July 15, 2008

Mr. Scott Sullivan  
Sea Engineering  
41-305 Kalanianaʻole Highway  
Waimanalo, HI 96795-1820

Dear Mr. Sullivan,

It is my great pleasure to inform you that the project you entered in the 2008 PCI Design Awards Program — Kaunalapau Harbor Breakwater Repair in Island of Lanai, HI — has been selected as a winner by our panel of jurors. Please accept our sincere congratulations.

From approximately 130 high-caliber entries, our three juries named a total of 33 winners of equivalent awards, including three Harry H. Edwards Industry Advancement Awards, two Best All-Precast Structure Awards, and four awards in the Sustainable Design category. A complete listing of winners is available at [http://www.pci.org/news/award\\_winners/index.cfm](http://www.pci.org/news/award_winners/index.cfm)

As part of a national publicity campaign, we're preparing a special issue of ASCENT magazine that will feature all of the winning entries. Over 45,000 architects, engineers, owner/developers, consultants, contractors, and public officials receive this publication. The *PCI Journal* will also publish articles on the winning projects.

Please review the enclosed credit sheet for accuracy. If any corrections and/or additions are necessary, please enter them on the credit verification form and email it to [cmerydith@pci.org](mailto:cmerydith@pci.org) or fax to (312) 786-0353. **Please return this form to me no later than Friday, August 1, 2008.**

We hope to see you at this year's PCI Convention/Exhibition in October in Orlando, Florida, where design team members affiliated with your winning project will be presented trophies at a special ceremony. Convention information can be found at: <http://netforum.pci.org/eweb/startpage.aspx?site=pciconv08>

Again, congratulations, and if you have any questions regarding the award, please don't hesitate to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Chuck Merydith".
